DETAILED ACTION

The prior art rejections are withdrawn due to Applicant's amendments.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 42-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Longobardi et al. (US 5,106,126).

Longobardi teaches a decorative sheet comprising in this order according to Fig. 4 and associated text: transparent plastic resin 12 (deformable base), ink image with fish pattern design 24 (decoration with pattern, the ink may also be translucent-3:60-65, and is thus visible), and reflective metal 30 (spread suppressing member) around all surfaces (first and second portion of suppressing member) of ink layer 24 except for the surface of ink 24 that touches transparent plastic 12. All claimed properties of the same material are inherent. Claims 42-53 are met.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 54-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Longobardi et al. (US 5,106,126).

Longobardi essentially teaches the claimed invention above.

Longobardi does not teach the exact ranges as per instant claims 54-55, however, size is an optimziable feature. It has been held that the provision of adjustability, where needed, involves only routine skill in the art. *In re Stevens*, 101 USPQ 284. Size of an article ordinarily is not a matter of invention. The size and dimensional recitations are all deemed matters of choice involving differences in degree and/or size and are not patentable distinctions. In re Rose, 105 USPQ 237.

Claims 56-59, and 90-93 are rejected under 35 U.S.C. 103(a) as being unpatentable over Longobardi et al. (US 5,106,126) in view of USPN 4,603,065 to Mori et al.

Longobardi essentially teaches the claimed invention above.

Longobardi does not expressly teach the sheet attached to a molded article or motor vehicle as per instant claims 56-57 and 59.

Mori teaches a decorative sheet comprising a base member (FIG. 2 and associated text), having a decoration layer (6, FIG. 2 and associated text) Mori teaches it was known to use decorative sheets used on automobiles for molding, nameplats, embles, or interior or exterior decorating of a car (col. 1, lines 45-60 of Mori).

Art Unit: 1774

Thus one having ordinary skill in the art would have modified sheet of Longobardi to include a molded article or motor vehicle as claimed because Mori teaches the use of the sheet used on automobiles for molding, nameplats, embles, or interior or exterior decorating of a car (col. 1, lines 45-60 of Mori).

The combination does not teach the exact ranges as per instant claims 57-58, and 93, however, size is an optimziable feature. It has been held that the provision of adjustability, where needed, involves only routine skill in the art. *In re Stevens*, 101 USPQ 284. Size of an article ordinarily is not a matter of invention. The size and thickness recitations are all deemed matters of choice involving differences in degree and/or size and are not patentable distinctions. In re Rose, 105 USPQ 237. Instant claims 56-59, and 90-93 are met.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Application/Control Number: 10/509,369 Page 5

Art Unit: 1774

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamra L. Dicus whose telephone number is 571-272-1519. The examiner can normally be reached on Monday-Friday, 7:00-4:30 p.m., alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
